

Cogbill Construction, LLC

In 1993, Wallace Cogbill, Jr. founded Wallace Enterprises in Southeast Texas and offered metal fabrication and general construction services to local markets. By 1999, the company had evolved into Cogbill Construction LLC, adding a full range of quality design-build services and complete industrial services, to the entire Gulf Coast region.

A family owned business, Cogbill Construction recognizes that customer loyalty is built through quality production with superior service at competitive prices, and fosters these relationships with effective communication, attention to detail, and responsive action.

Cogbill Construction pursues excellence and growth, seeking world-class certifications such as ASME, AISC, and AWS. The company also employs the best Lean Manufacturing methodologies such as 5S, Kanbans, Visual Workplace and PDCA cycles.
