Cogbill Construction offers industrial maintenance and repair services to plants, mills, manufacturing facilities, and most other commercial and industrial sites, targeting manufacturing and process equipment services. We offer either short or long term maintenance service contracts, as well as plant turnarounds, shutdowns, and rapid emergency response services.

We are certified members of both ISNetworld and Avetta (Formerly PICS), and have an impeccable, incident-free safety record. We employ only the most skilled multi-craft personnel, including millwright and mechanical maintenance and repair experts, who possess the advanced technical training required to perform their responsibilities efficiently, along with rigorous safety training to perform their work safely. We readily meet the needs of any project by providing our own equipment, including portable welding equipment, portable generators, cranes, forklifts, and heavy excavating equipment, along with trained personnel to operate the equipment.
