Cogbill Construction has over 20 years of experience in the oil and gas industry. We provide turnkey solutions to ensure the highest quality products from concept to completion. Our RedLineIPS Piping Supports and Accessories can accommodate pipes sized 2" to 72" in diameter and can be made from carbon, stainless, or other alloy steel, with mill finish or hot-dip galvanized. Our RedLineIPS non-metallic wear pads are available in various dimensions and thicknesses to protect your piping systems from corrosion and vibration. Our welders are certified per AWS and ASME Section IX, SMAW, GTAW, GMAW, FCAW, and combination procedure to accommodate all customer requirements, with full material traceability on all our raw material.
