

REDLINEIPS COMPOSITE FLAT PADS

- OUTSTANDING CORROSION PROTECTION
- ACCOMMODATE ANY PIPE SIZE
- MAINTENANCE-FREE PERFORMANCE
- TEMPERATURE PERFORMANCE OF -320°F - 400°F
- LOW FLAMMABILITY & FIRE RETARDANT
- NO SKILLED WELDERS OR HOT WORK PERMITS REQUIRED
- INSTALL ON LIVE LINES, SYSTEM SHUTDOWN NOT REQUIRED

Cogbill's RedLineIPS Composite Flat Pads System delivers unmatched corrosion protection to industrial piping systems. Our flat pads are manufactured from a specially formulated fiberglass composite material. This proprietary material is UV stable and load-tested to ensure peak performance in the most demanding environments such as marine, off-shore, and other highly corrosive environments. RedLineIPS pads and epoxy combine to provide high shear and compressive strength, tested for 113,000 lbs. compressive load capacity*.

RedLineIPS offers a complete Composite Flat Pads System that includes: Composite Flat Pads, Two-Part Epoxy, Epoxy Applicator Gun, Applicator Mixing Nozzle, and preparation and cleaning solutions, as well as full installation and training guides and services.

* Verified by independent lab testing, contact us for details
